ABOUT ME

Knowledge engineering student at the university of computer studies, Yangon (UCSY) with a CGPA of 3.92/4.00 and strong foundations in machine learning, natural language processing, data mining, and software engineering. Experienced in developing AI-powered systems, NLP applications, and full-stack web solutions through academic projects and competitions. Seeking an AI Engineer, Machine Learning Engineer, or Data Engineer role where I can apply machine learning, NLP, and software engineering skills to build intelligent data-driven solutions.

EDUCATION

University of Computer Studies, Yangon (UCSY)
Bachelor of Computer Science (Knowledge Engineering)
Expected Graduation: 2027
CGPA: 3.92 / 4.00

Relevant Coursework:
Machine Learning, Data Mining, Natural Language Processing, Database Systems,
Knowledge Engineering, Data Structures & Algorithms

KEY SKILLS

Machine learning | natural language processing | data mining | data analysis | computer vision | deep learning | data visualization | full-stack development | database design | research & problem solving | team collaboration

TECHNICAL SKILLS

Programming Languages:

Python | Java | SQL

AI & Data Technologies:

Pandas | NumPy | Scikit-Learn | TensorFlow | mT5 | mBART-50 | NLP | Data Mining

Tools & Frameworks:

Git | GitHub | MySQL

ACADEMIC PROJECTS

Burmese News Headline Generation System Natural Language Processing Project | September 2024

- Developed An Automated Burmese News Headline Generation System Using BiLSTM, mT5, And mBART-50 Models.
 - Trained And Evaluated Models On Over 15,000 Burmese News Articles.
 - Designed A Complete NLP Pipeline Including Preprocessing, Tokenization, Fine-Tuning, And Evaluation.
 - Assessed Model Performance Using Bleu, Rouge, And Bert score Metrics.
 - Demonstrated The Effectiveness Of Transformer-Based Models For Low-Resource Burmese Language Tasks.
-

Yaung Wel Full-Stack E-Commerce Application University Project Showcase | September 2024

- Architected A Full-Stack E-Commerce Web Application Using Java Servlet, MVC Architecture, And Maven.
 - Implemented RESTful Json Data Handling Using Jackson Databind And Org.Json.
 - Collaborated In A Four-Member Development Team With More Than 105 Git Commits.
 - Presented The Project At The UCSY Project Showcase.
-

WOLFEYE Smart Entry – AI-Powered Workplace Safety System Yangon University Science Fair 2026 | February 2026

- Developed An Intelligent Safety Monitoring System Combining Face Recognition And PPE Detection.
 - Integrated Real-Time Computer Vision Techniques To Verify Safety Compliance Before Restricted-Area Entry.
 - Presented The Project To Faculty Members And Industry Visitors At The Science Fair.
-

Smart City Waste Management Solution Myanmar Engineering Education Smart City Hackathon | November 2024

- Collaborated In A Hackathon Environment To Design An AI-Assisted Waste Management Solution.
 - Proposed AI-Based Smart Trash Sorting And IoT-Controlled Smart Container Bots.
 - Applied 3d Modeling Concepts To Support Solution Visualization And Implementation Planning.
-

ACHIEVEMENTS

- Presenter, Yangon University Science Fair 2026 – WOLFEYE Smart Entry.
 - Participant, Myanmar Engineering Education Smart City Hackathon 2024.
 - Presenter, UCSY Project Showcase 2024 – Yaung Wel E-Commerce System.
-

LANGUAGES

- English (Professional Working Proficiency)
- Japanese (Basic)
- Burmese (Native)
